My practice sees me creating with the beautiful medium of glass as well as painting. My artwork often depicts the natural and historical environment around me including local lore and legend with horses featured regularly! I will have some original artwork as well as prints and cards

The wildlife and landscape of Scotland provide the inspiration for my stained glass art. Using traditional lead and copper foiling techniques, I produce three dimensional pieces, window panels and artwork set in locally sourced wood.. A warm welcome (and a cuppa) awaits you.

"The Five Mile Draw". It combines art and my love of walking. Placing our house Stewartfield in the centre of a five mile circle I study, draw, photograph, collect materials, print, paint anything and everything in that area.
